

Notes: Nonparametric estimates of log wage change between two periods by percentile of the wage distribution. Early period is 1992-1994 (15,205 worker-years), late period is 1998-2000 (17,475 worker-years). Firm-occupation cells that have already imported by 1994 are excluded. Counterfactual growth computed from firm-occupations cells that never import. Lowess curve with bandwidth of 0.33.
